WOOD SHED IDEAS

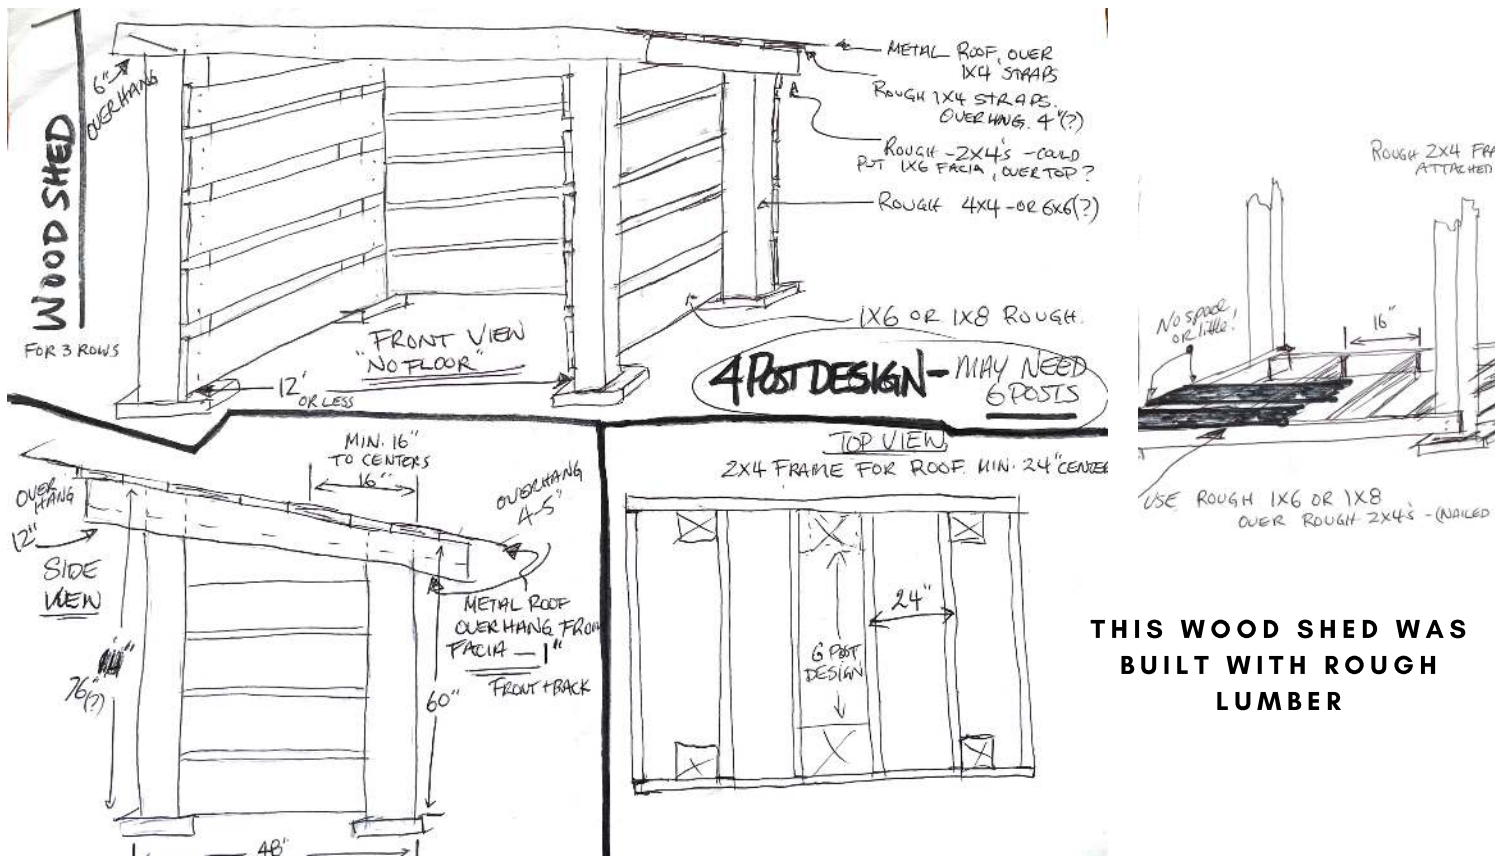

@sewbrightcreations

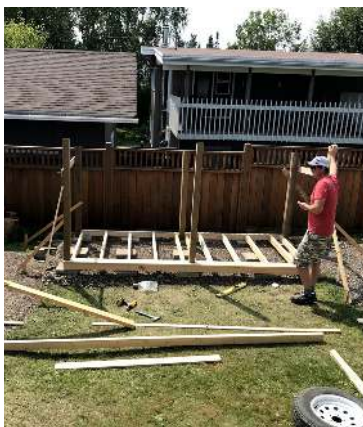

Want to build a wood shed, but not sure where to start? We've got the perfect starting point for you! You'll likely need to make some adjustments to suit your needs, but we hope this helps you get started.

The sketches show one design and the photos (what we actually built) shows a slightly different design; we added a middle post and wall to separate the wood.

Sketches are from Poppa Sew Bright and build is done by Mr. Sew Bright with some Poppa Sew Bright guidance. Sketches are not to scale; please check your local regulations for building code requirements.

THIS WOOD SHED WAS BUILT WITH ROUGH LUMBER
